Pseudocode for the paper airplane

1. Fold the paper into half with the long side
2. Fold the top of the right side to touch middle
3. Fold the top of the left side to touch the middle
4. Fold the top again to touch the half of the middle
5. Fold both sides towards the middle so that they can touch each other
6. We are gonna fold it up the one in the middle (the one that we fold on the number 2,3)
7. Fold the paper into half but backwards
8. Fold the paper half way again
9. Fold the top backwards so we can use it as a plane.
